```javascript
var attempt_login = function attempt_login(){
    var username = $('#login-username').val();
    var password = $('#login-password').val();

    var params = decode_params(window.location.search.substring(1));
    var refer = params['refer'];
    if (!refer) {
        refer = '/index';
    }

    $.couch.login({
        name: username,
        password: password,
        success: function(data) {
            setTimeout(function() { window.location = refer; }, 10);
        },
        error: function(status) {
            show_error("Unable to login user", status);
        }
    });
}

var attempt_logout = function attempt_logout() {
    $.couch.logout({
        success: function(data) {
            console.log("Logged out");
```
